Vinh Thuan, An Giang, Vietnam
github.com/NoNameVI

SUMMARY

Third-year Software Engineering student focused on Java Backend. Led AURA Shore Store's catalog work, including public/admin category search; also designed core mechanics for Tetris 2048 Fusion.

PROJECT EXPERIENCE

AURA Shore Store

Team Lead / Java Backend · 2026 - present

Shoe e-commerce application · Java / Spring Boot

gitlab.com/auraproject/aura-shore-store

- Coordinated tasks and reviewed code before integration; built product, variant, and brand management features.
- Separated category search by audience: storefront hides inactive categories while admins can still find them.

Tetris 2048 Fusion

Team Lead / Core Mechanics · Summer 2026

Tetris + 2048 game · JavaFX

github.com/NoNameVI/Tetris2048Fushion

- Designed the architecture and coded core mechanics: a 10 × 20 board, falling/rotating pieces, and 2048-style merging.
- Integrated 5 game modes with the JavaFX interface and JSON-based player profiles and high scores.

SKILLS

Languages	Java, C
Framework / UI	Spring Boot, JavaFX
Databases	MySQL, Microsoft SQL Server
Tools / Office	Git, GitHub, GitLab; Microsoft Office (intermediate)
Team leadership	Led many projects; tracked work and reviewed code
English	Reads technical documentation and software books

EDUCATION

FPT University, Can Tho Campus

2024 - present

Software Engineering · Third-year student · Converted GPA 3.28/4.00

AWARDS & ACTIVITIES

2023 First Prize, Kien Giang Provincial Youth Informatics Contest

2026 Honorable Student of Trimester, Spring 2026, FPT University

2025 Participant, ICPC Southern Vietnam Regional Contest
